Exhibit packet

Whitfield v. Whitfield

Franklin County, Ohio | Case No. 26 DR 000123

Prepared for attorney review

Period: 4 March 2026 to 18 March 2026

Contents: 2 exhibits · chronology · authentication appendix

Example generated from fictional records. No real people or files.

Each attachment is identified by a SHA-256 fingerprint, capture time (when available), upload time, and any amendments to its parent record. The original record is retained alongside later revisions.

FOR US MATTERS

This packet is prepared to support authentication under Fed. R. Evid. 901 and 902(13)–(14) and state analogues. It does not establish admissibility and is not legal advice.

Amendment history · INC-2026-0001

5 March 2026 at 08:30 — clarified waiting duration. Original text: “I waited until about 18:30.” Amended text: “I waited until 18:40.” Reason: checked the timestamp of the saved message.

This is a sample layout only. The example hashes above are shortened illustrations, not computed from real files. In a real export, Folioh includes the SHA-256 hash stored at upload, file metadata when available, and recorded amendments. A file fingerprint is not independent proof of when an event occurred.
